

# Hotels Etc. distributorship

## Do I need my own domain name?

We will provide you with an extension off our domain.

Example: [www.hotelsetc.us/111](http://www.hotelsetc.us/111) If you do purchase your own domain, then you can log into your domain back end and simply do a forwarding so when someone visits your domain they will redirect to the site we provide you with. If you are having issues with forwarding your domain please call your domain provider, however it is typically very easy to forward the domain to your site.

Unique solution ID: #1009
