

Hotels Etc. distributorship

You say you have the best discounts on Travel on the internet.. How do I know this? Why can't I see your prices when I visit the website?

There is a law known as Rate Parity which is a legal agreement between hotel and OTA providing the same rates for the same room across all distribution channels. The Rate parity laws prohibits companies like Hotels Etc. to display wholesale net rates unless you are a paid member. Hotels Etc. is considered a CUG program (closed user group) which means we are allow to offer discounts to our members unlike public sites. We beat public rates by up to 75% off.
